DESCRIPTION OF PROPOSED WORKS

Water is diverted from the spring by means of a pipe running in a State manner in which water is to be diverted, whether by dam or other works, whether through pipes, ditches, flumes, or other conduits. If water	<u> </u>
southwesterly direction a short distance to a proposed stockwater	i i
is to be stored in reservoirs, it should be so stated and the location of the reservoir should be given with reference to the legal subdivisions.	
i ci ougii.	
	· ·
5. Estimated cost of works Trough and pipe. \$200.00: pipeline and	trough
\$4,151.20	tt ougi
6. Estimated time required to construct works one more month	
7. Remarks No one but this ranch has ever maintained this spring r	or
used it for the last twenty years. It was understood by us that	his
belonged to the ranch, hence the expense. Without it one-third of	
our summer and winter range is useless.
